EXPERIENCE

Cloud and AI Solutions Engineer — BetterWorld Technology

Oct 2025 – Present

- Auto-assigned 100,000+ tickets in six months with an Azure Functions dispatcher on the PSA/ticketing REST API (ConnectWise Manage)—board selection, round-robin, and weighted-load assignment
- Built MCP tool servers with auth and RBAC for ticketing, RMM, quoting, and CSAT products (ConnectWise Manage, Asio, CPQ, SmileBack); deployed on auto-scaling Azure Containers
- Designed a Cosmos DB + MCP data layer for docs, projects, invoices, tickets, technicians, devices, CSAT, and quotes
- Shipped an ops dashboard (Azure Containers + Redis) with ticket views, health scores, MTTR, Sankey/bar charts, and Azure AI Foundry note analysis—plus weekly/monthly ops reports
- Cut new-hire onboarding from 2–5 business days to 5–10 minutes with n8n (licenses, Graph credentials, apps, managers, calendar, welcome email)
- Built Power Automate feedback/scheduling flows; used Claude in the engineering workflow for implementation, testing, and deployment

Associate Data Engineer — Nexturn India

Jun 2022 – Dec 2023

- Built and operated ETL pipelines with Matillion, Python, and SQL
- Transformed Splunk Data Lake extracts with PySpark for payment reconciliation
- Maintained PostgreSQL databases for financial reconciliation and data quality
- Delivered Tableau and Power BI dashboards for operational and financial reporting

EDUCATION

Florida Atlantic University

Master's in Data Science and Engineering — Data Science & Analytics

Jan 2024 – May 2025 · Boca Raton, FL · Full-time

Coursework: Machine Learning, Large Language Models, Deep Learning, Data Visualization, Data Mining, Cloud Computing (AWS), Database Systems, Big Data & Distributed Computing, Reinforcement Learning

SELECTED WORK

Ticket dispatcher + MCP RBAC demos — public

- github.com/Jaswanthnani02/ticket-dispatcher-demo · github.com/Jaswanthnani02/mcp-rbac-demo

Ops analytics dashboard — BetterWorld Technology

- Cosmos DB ops console with Redis caching, Sankey/bar charts, and Azure AI Foundry note analysis

Payment recon & ETL — Nexturn

- Splunk → PySpark → PostgreSQL reconciliation; Matillion ETL with documented data flows

SKILLS

Languages	Python, SQL
Cloud & Platforms	Azure Functions, Azure Containers, Cosmos DB, Azure Redis, Azure AI Foundry, Microsoft 365, AWS
AI & Automation	MCP, n8n, Power Automate, LangChain, RAG
Data Engineering	Apache Spark, PySpark, Matillion, ETL, PostgreSQL, Power BI, Tableau
